Hurricane Category	Windspeed (MPH)
1	74-95
2	96-110
3	111-130
4	131-155
5	>155

### Hurricane Evacuation Information

Find the location of your home on the map and note the evacuation zone where it is located. If you are in the **BLUE ZONE (A)**, plan to evacuate for all hurricanes. Those in the **YELLOW ZONE (B)** should plan to evacuate for Category 3, 4 or 5 storms. If you live in the **PURPLE ZONE (C)**, you should plan to evacuate for a Category 4 or 5 hurricane.

If you live near an evacuation zone boundary and are unsure of the evacuation zone you are in, err on the side of caution and assume you are in the zone nearest the coast. If you live in a mobile home in any of the three evacuation zones, plan to evacuate any time a hurricane threatens.

The main evacuation routes are highlighted in red on the map. These routes will take you out of the area of immediate danger to safety and shelter further inland. When a hurricane threatens, listen for instructions from local officials on how and when to evacuate and follow those instructions.
